Welcome

Tamlite Lighting is no ordinary lighting manufacturer. Founded in 1967, we live and breathe our philosophy of Lighting for a Living. For us, it is much more than a marketing tagline. It crystallises how we think about light and the impact it has on every aspect of our lives.

How we live, work, play, learn and exist are all basic human needs that are influenced by light. Creating environments that are perfectly lit - comfortable, practical, efficient, safe and inspiring - is what we do, and it is what we have done well for over 50 years.

As we have expanded, Tamlite Lighting remains committed to its British roots, with extensive R&D, testing and manufacturing activities managed out of factories in Redditch and Telford. Today, Tamlite offers over 500 product ranges and in excess of 15,000 products, cementing its place as one of the industry leaders in cutting-edge lighting solutions across all sectors.

Let's start a conversation. Share your lighting challenges with us and experience Tamlite for yourself.

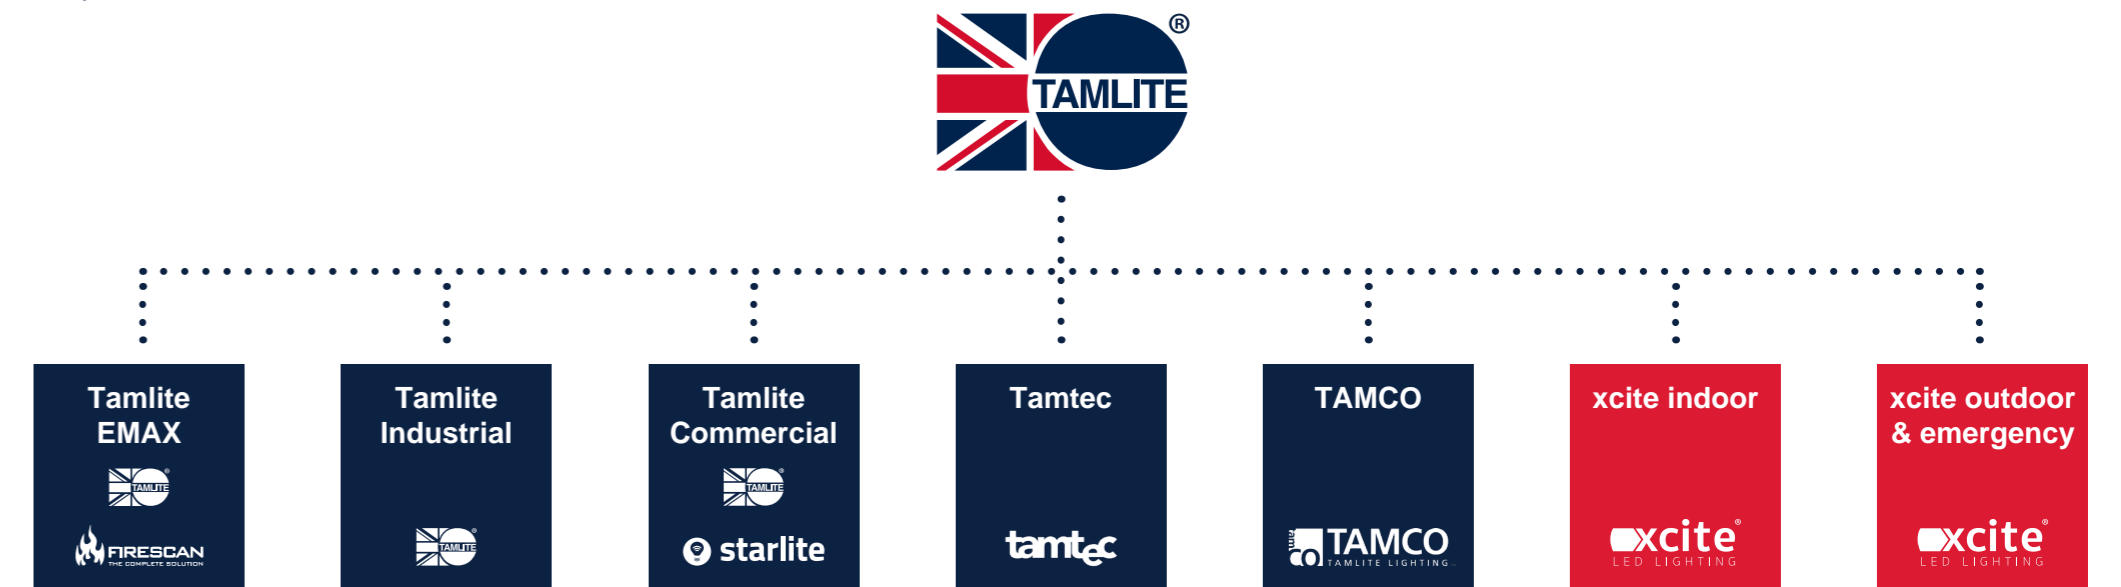

Lighting for a Living

Tamlite Lighting's goal is to be the lighting manufacturer of choice. Our experienced staff and heritage mean we are on hand to provide the right solution.

Tamlite Lighting

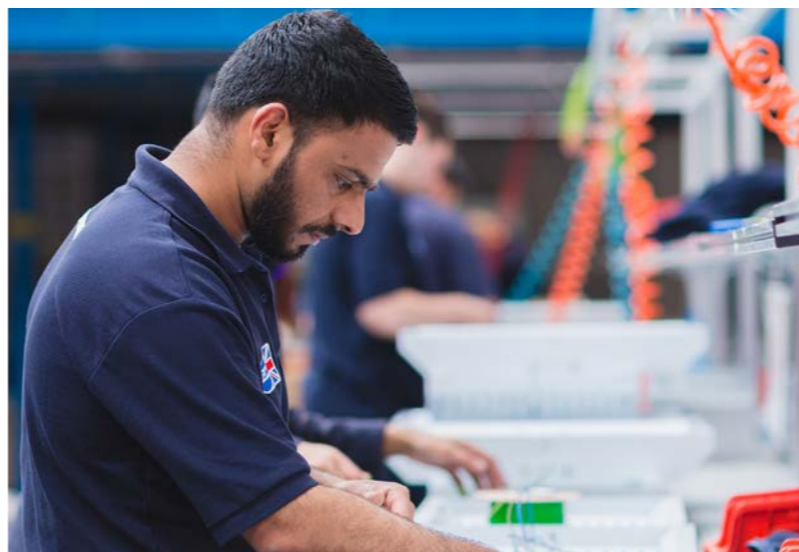

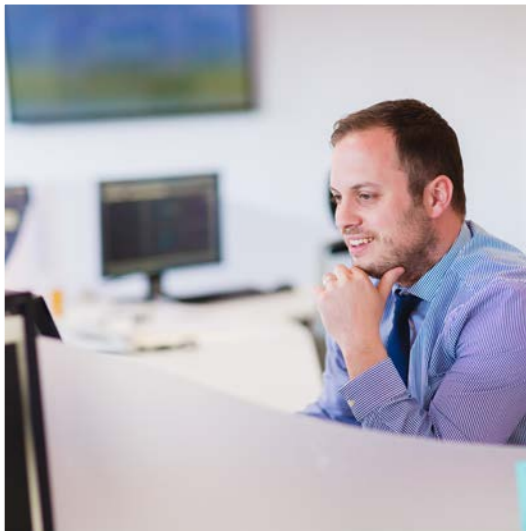

At Tamlite, we are proud of our founding principles, our heritage and our employees. For over 50 years, we have evolved organically and established Tamlite as one of the UK's leading lighting manufacturers.

- **Tamlite Industrial** Division delivers high-output, high efficiency lighting solutions, designed for industrial, high-bay, low-bay and specialist applications.
- **Tamlite Commercial** Division offers a range of performance solutions for offices, retail stores and the education sector.
- **Tamlite EMAX** Division supplies optimised emergency, communal and outdoor solutions, designed to be weather and vandal resistant. EMAX also includes our Firescan brand, which supplies the latest in fire alarm technology. Finally, solutions for 'zoned' hazardous areas are also in the EMAX portfolio.
- **Tamtec** Division produces high quality light engine PCBs and modules, ensuring that the Tamlite product design team can respond even more quickly to changes in LED technology.
- **TAMCO** Division stores and supplies a large stock of spares and parts for lighting solutions, with a next-day delivery process available for every order.
- **xcite indoor** Division provides utility indoor lighting solutions for our xcite brand, ensuring that lighting solutions can be provided for a huge range of applications.
- **xcite outdoor & emergency** Division supplies mainstream solutions for outdoor and arduous environments, as well as high quality emergency lighting products.

The Tamlite Team

Tamlite is very proud of its employees, and we invest in our people to make sure that they are qualified to provide the best service for our customers. Annual submissions to the LIA certificate course ensure that our sales and technical staff are fully equipped to help our customers with their lighting project. Our trainee scheme has been incredibly successful in producing more knowledgeable colleagues at Tamlite. Tamlite is honoured to have been Lighting for a Living for over 50 years, and we are fortunate to have so many people who have stayed with us along the way.

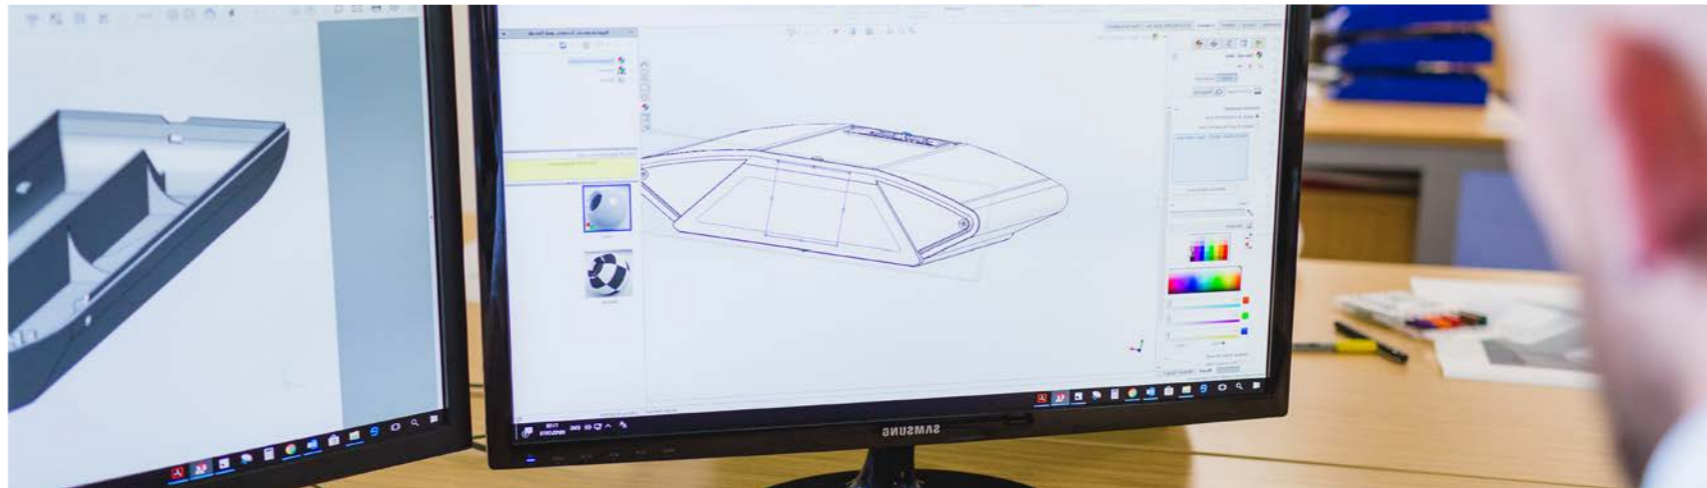

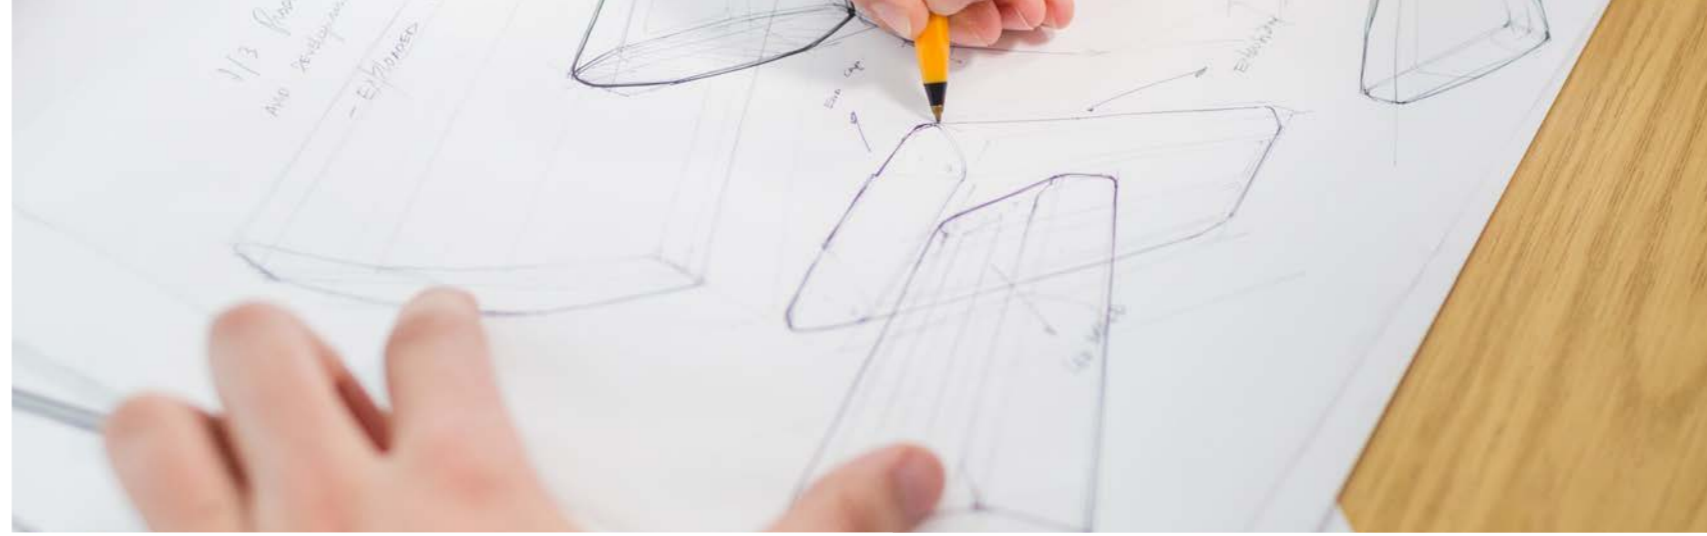

Designing for a Living

The Tamlite product design team listen to what our customers' needs are, and create innovative lighting solutions that benefit consultants, contractors and end-users. Our expert product designers are always looking for ways to improve the efficacy, usability and optical output of our products, designed and manufactured here in the UK.

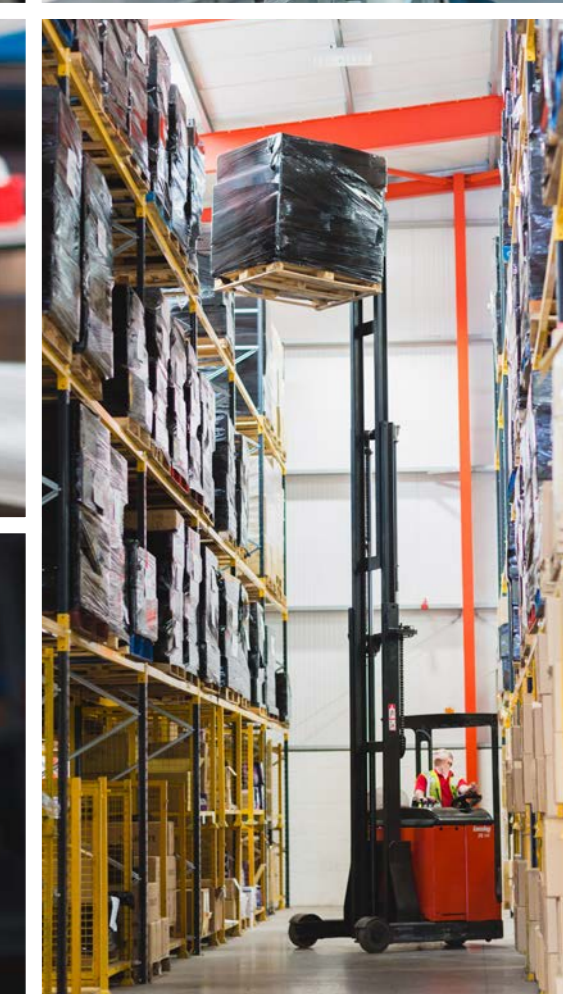

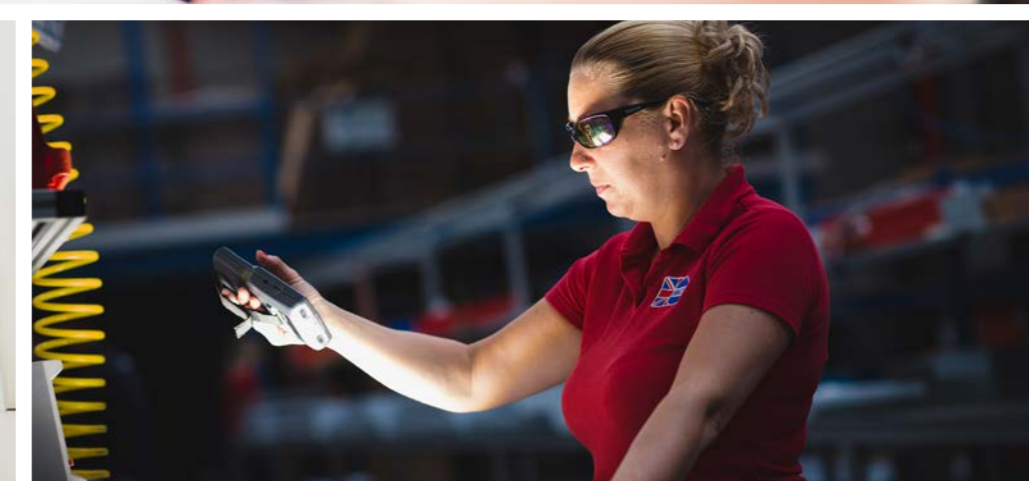

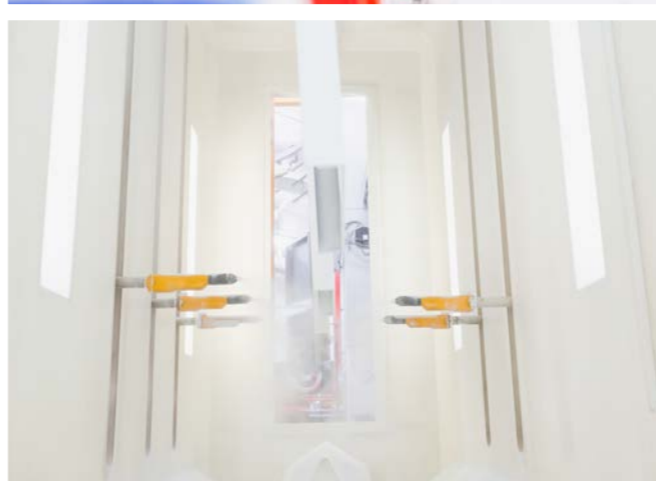

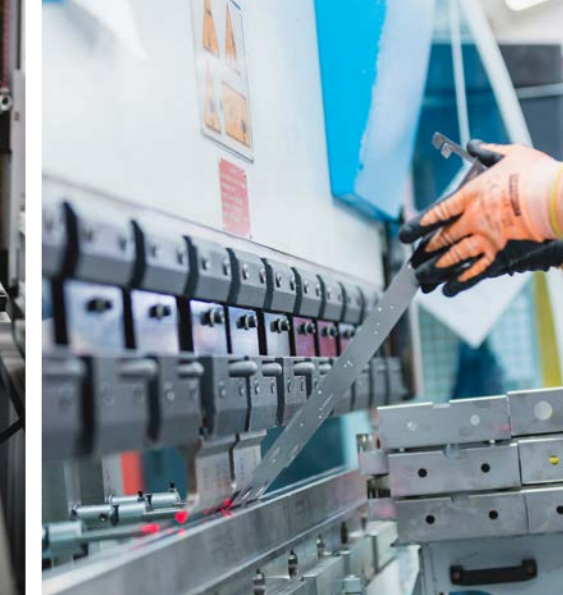

The product design team respond to customer requirements, and design luminaires that make customers lives better. Whether it is creating new product innovations or designing a bespoke luminaire to a specific customer brief, our product designers are always thinking up new ways to improve the solutions that we provide.

By listening to what our customers need, the design team can work quickly to provide the best solution, while minimising costs. Supported by a major SMD investment programme over the last few years the Tamlite project range offers quality, UK manufactured light engines and luminaires for designers, consultants and major installers. Manufactured under the Tamtec brand, the LED light engines from Tamlite's new production lines will enable the product design team to respond quickly to fast-moving changes in LED product technology.

Manufacturing for a Living

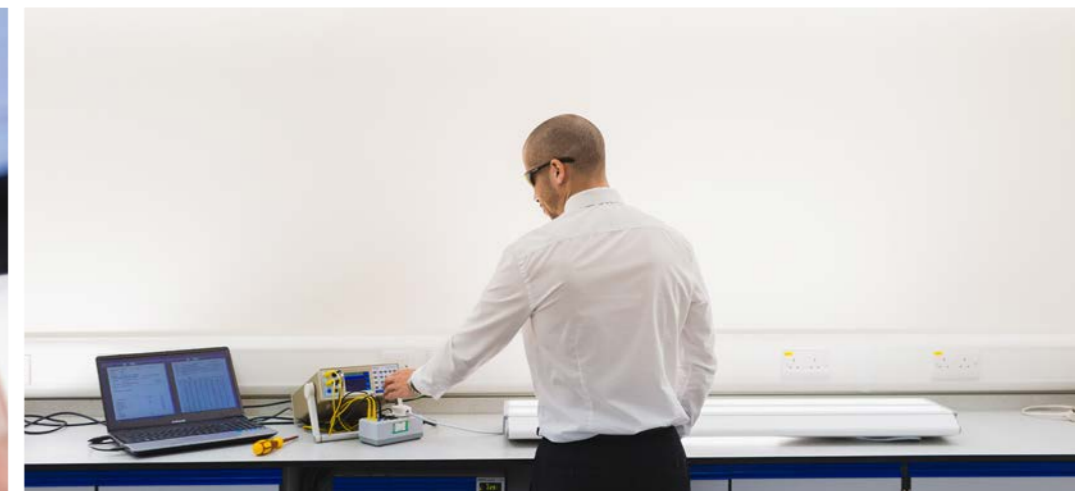

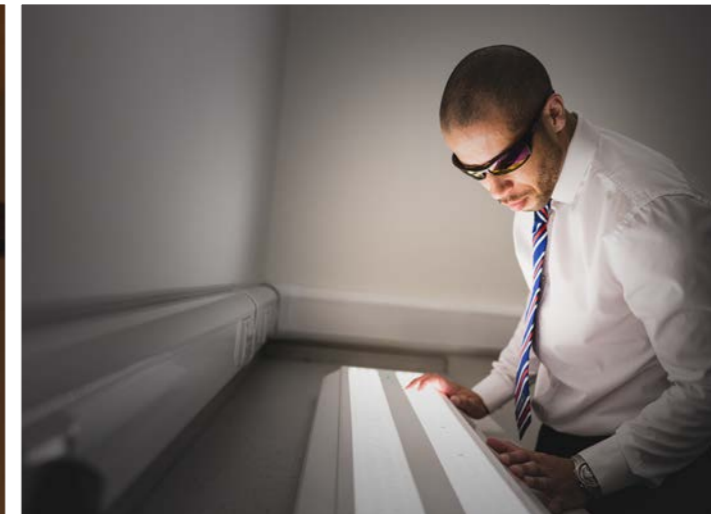

Tamlite's British-based factories have been manufacturing for over half a century, showing our experience in creating high quality lighting solutions that give our customer's the best possible choice. In the last five years, Tamlite has invested over £4M in the latest production technologies to stay at the cutting edge of light engine and luminaire performance.

Quality for a Living

Tamlite is proud to be the manufacturers of high-performance and high-quality products. As a result of our best-practice and rigorous testing procedure, Tamlite products are as good as it gets. We are pleased that our commitment to quality was recognised, as we received accreditation from the Lighting Industry Association (LIA) through winning their inaugural national award for Quality Assurance. It is satisfying that we have been acknowledged for our expertise in creating innovative lighting products, as well as our effort and desire to ensure that these products were right for our customers.

As a BAFE certified company, Tamlite Lighting emergency lighting system designs are confirmed to be compliant with British emergency lighting standards, providing peace of mind to our customers.

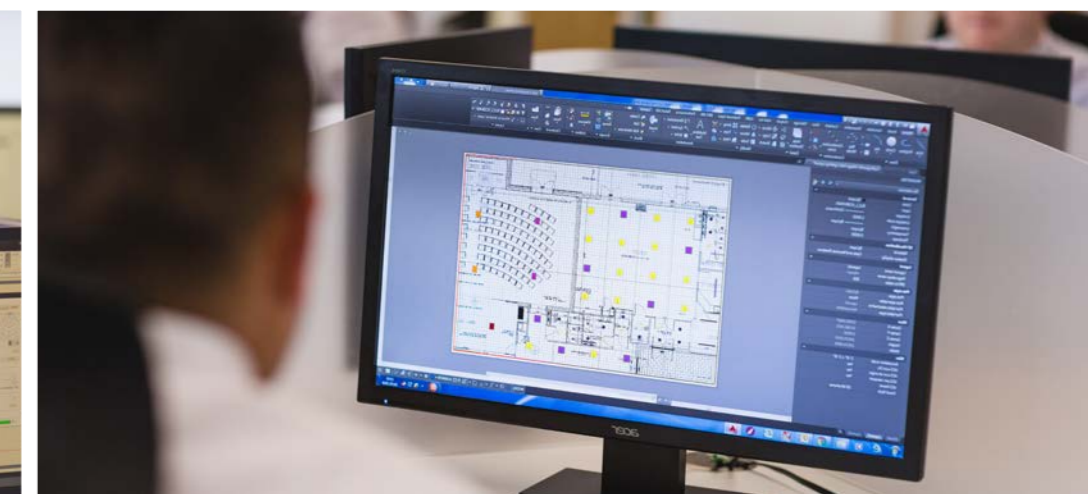

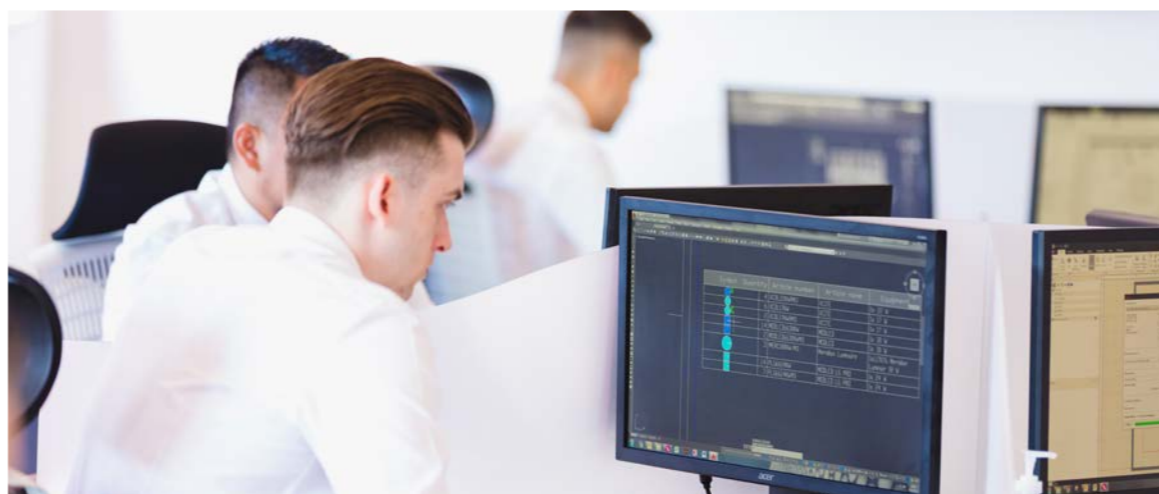

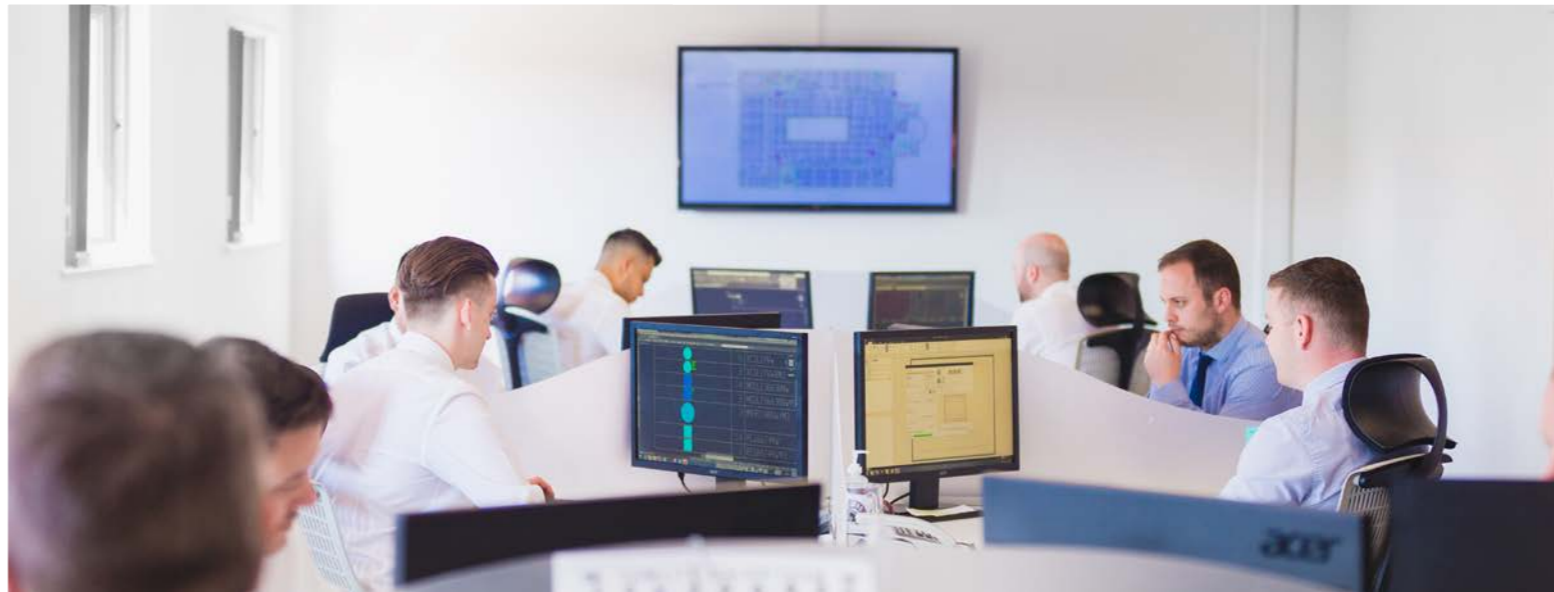

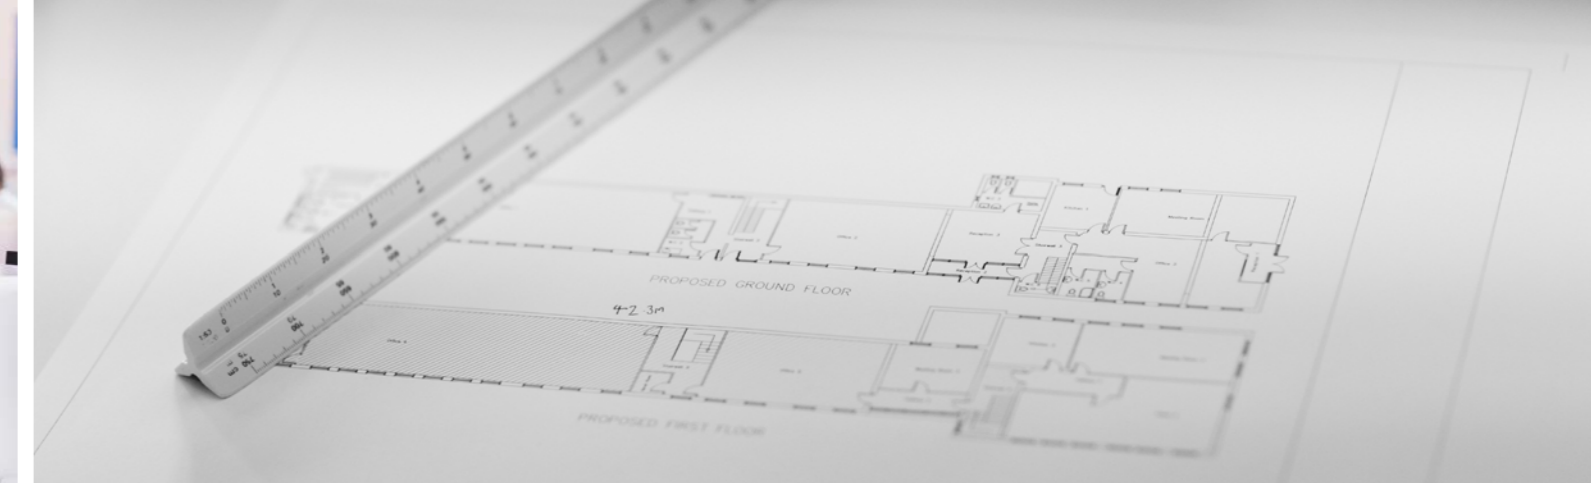

Lighting Design for a Living

The TamLite Technical team have the expertise, experience and technology to ensure that every new TamLite product is fit for purpose, and to design the right project solution. Our Technical team have over 100 combined years of experience in lighting design, with a balance of expertise and an injection of fresh ideas. Our Technical team ensure that spaces are illuminated the right way, to maximise energy savings and comfort for building managers and occupants.

Lighting installations and specification projects need to be analysed, to specify what lighting solutions are required, and in what layout they should be installed throughout the space. Our Technical team use the RELUX platform, together with an in-depth knowledge of lighting design to assess TamLite specification projects.

Once a project has been assessed, and the requirements have been exacted by the team, then a comprehensive design begins. This is supported by detailed dialogue with the customer, to provide the right lighting solution.

Lighting for **your Living**

Tamlite Lighting supplies lighting solutions to many sectors, owing to the diversity of products that we design and manufacture. With such a huge range of solutions designed for different spaces, there is no environment in which Tamlite products would look out of place.

Tamlite LED light engines are manufactured under the Tamtec brand. These high-quality surface-mount modules ensure that our luminaires perform as they should, maximising the efficacy and lifespan of the products. Based in Telford, Tamtec allows the Tamlite product design team to produce innovative luminaires quickly, to respond to the constantly evolving lighting industry. Having invested over £0.75M in the Tamtec production facility, Tamlite has shown a commitment to British-based manufacturing, and ensuring that every part of our lighting solutions have been built with quality assurance in mind.

The xcite brand delivers a huge range of products, applicable for an array of environments. Our xcite products are versatile, and each fitting can be suitable for several applications. With a huge product portfolio, the xcite brand is ideal for contractors and tradespeople, to get the right product for the right job. Our xcite products are focused on providing the tools for the job, at competitive costs, allowing you to complete a lighting installation while keeping expenses down.

Tamlite Lighting regularly offers tours of our factories and showrooms, so that you can see the outstanding work that we do, and how we do it.

Tamlite also runs CPD presentations from our factories, continuing our programmes for development and training.
