EWL2.0

WHY EWLIVE2.0?

- EW Live is a **unique, proven and successful** concept, enabling vendors to demonstrate capabilities in a live environment. Military delegations from around the world greatly value the format, and the contrast this presents to standard mock-up demo's and scale models seen in traditional exhibitions.
- Identifying the new technology challenges, and providing comprehensive solutions from the commercial sector to meet growing Military stakeholder requirements.
- **Private live demonstrations & Workshops** scheduled with Military delegations of your choice.

WHAT IS THE NEW ENVIRONMENT?

Within the new Multi-Domain Operations construct, the EME (Electromagnetic Environment) has moved to the center of Great Power technological competition. Key adversaries are fielding advanced EME capabilities to attack, destroy, and defend in all domains, including Space and Cyber. Their training and doctrine increasingly plan for EME capabilities to be the sharp tip of the spear in any engagement.

Front-line practitioners who face these cutting-edge peer capabilities are hungry for training, solutions and technologies that can perform in real-world conditions - conditions that are evolving at an accelerating pace. AI, Cyber, 5G, Quantum and lasers are moving rapidly from theory, into front-line systems and training.

AGENDA

EWLive2.0 will introduce a one-day Practitioner Conference in Tartu, Estonia, to launch the 4-day event, bringing together front-line voices who are experiencing real-world challenges, needing winning solutions today, and capabilities that are upgradeable and survivable in a rapidly evolving threat environment.

Days 2-4 will have concurrent advanced technology/capability/training Workshops, EW Live, and UAS/CUAS activities in three adjacent locations in the Tartu area in Estonia.

There will be a Gala dinner evening, as well as drinks reception evening hosted by Estonian Ministry of Defence.

The whole EW Live event was fantastic & the CD day was incredibly useful. I felt all the content was pitched appropriately & provided useful & insightful perspective of the future threats that we are like to encounter.

Major, OC 237 Sig Sqn, 14th Signal Regiment (Electronic Warfare), UK

Thank you for your very kind and solid support. The delegation really enjoyed the event and found it very useful. I was informed that the Ukr MoD is intended to visit the EWL next year
