

STAFF TRAINING

Would your staff be able to use safety equipment with confidence in an emergency? Having a sufficient number of staff trained to fire marshal, perform first aid or operate an evacuation chair could save lives.

- Fire safety training
- Evacuation equipment training
- Defibrillator & CPR training
- First aid training
- 'Train the Trainer' courses

Safety Equipment Servicing, Surveys & Training

Safelincs[®]
Fire & Safety Solutions

Ensuring all fire safety equipment at your premises is in good working order is not only a legal requirement, but could ultimately save lives. Safelincs' experienced team can carry out a wide range of fire and safety services and will support your organisation to maintain a safe and compliant environment.

EXTINGUISHER SURVEY

If the risks have changed in your premises, you may need a fire extinguisher survey to establish whether the fire extinguisher provision is suitable and sufficient.

'Fabulous staff. Really pleasant and explained everything he had done. Very satisfied and would definitely use Safelincs again.'

LEVEN CE PRIMARY SCHOOL

EQUIPMENT SERVICING

It is a legal requirement to regularly service and maintain fire safety equipment so that it is always ready for use in an emergency.

Our qualified team can carry out a range of fire and safety equipment services at your premises anywhere in mainland UK:

- Fire extinguishers
- Fire doors
- Fire alarms
- Emergency lighting
- Evacuation equipment
- Defibrillators

'Excellent quality of service, and Safelincs were professional and able to provide an installation sympathetic to our heritage site'

FIRE STRATEGY

A retrospective fire strategy can be fundamental in supporting all aspects of fire safety. The information gained from a fire strategy report informs passive fire protection, escape route planning, detection measures and fire safety management.

FIRE RISK ASSESSMENT

Have the risks in your premises changed since your last fire risk assessment was undertaken? Having an up-to-date fire risk assessment is a legal requirement.

We offer professional fire risks assessments by a fully certified assessor. You will receive a full comprehensive report, providing you with a clear indication of any areas of improvement.
