

Exposure to trauma adds up. Track it in real time.

You can't manage cumulative exposure if you can't see it.
What if automated exposure monitoring was built into your case management system workflows?

Immediate effects:

- ✓ Triggers threshold alerts
- ✓ Helps limit exposure
- ✓ Enables access to support
- ✓ Manages repeat exposure

Over time:

- ✓ Reveals high-risk patterns
- ✓ Quantifies exposure
- ✓ Informs safer procedures
- ✓ Flags high-impact events
