Secure and efficient handling of exhibits

STREAMLINE EXHIBIT MANAGEMENT

Exhibits is a fully integrated, end-to-end solution for managing exhibits - from collection and storage to auditing and disposal.

It's purpose-built for public safety agencies to streamline task management, maintain a secure chain of custody, and boost operational efficiency at every stage.

As part of the bdna public safety platform, exhibits connects seamlessly across teams, systems, and workflows - supporting smarter decisions from the field to the courtroom.

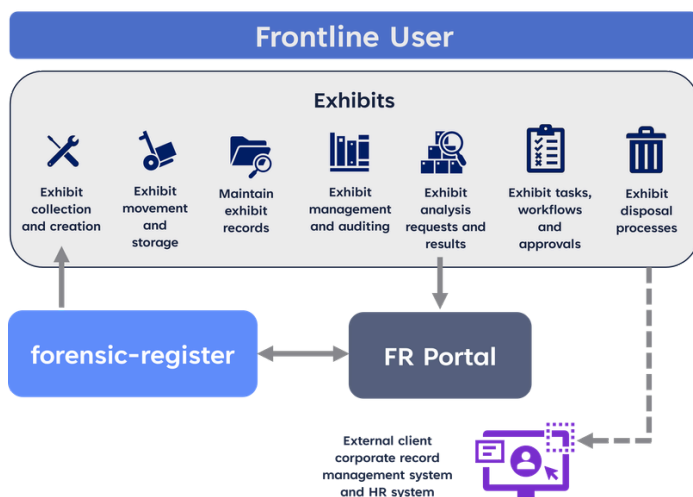

SEAMLESS BY DESIGN

Exhibits is designed to work effortlessly with your existing systems and workflows.

It integrates smoothly with other bdna products - and third-party systems - to ensure secure, accurate data sharing at every stage.

No double handling. No data gaps. Just reliable workflows from frontline police to specialist units ensuring continuity of evidence throughout criminal investigations.

With scalable cloud tech, secure access controls, and a design built around real users, Exhibits gives your workforce the tools they need to work smarter - together.

BENEFITS

Increase efficiency across the exhibit lifecycle

From collection and movement tracking to disposal and analysis requests - exhibits helps teams work faster with less effort.

Cut the paperwork, not the accountability

Digitise your processes to reduce form-filling and physical records - while maintaining a clear, auditable chain of custody.

Work smarter across connected systems

Eliminate duplicated data entry with seamless integration into existing platforms - one source of truth, less admin.

Stay in control with real-time oversight

Gain full visibility through dashboards, approval workflows, and detailed history logs that help you stay audit-ready anytime.

Manage high-risk exhibits with confidence

Limit access, track user actions, and enable verification checks for cash handling, drug evidence, or firearms. Built-in legislative safeguards ensure compliance from day one.

Ready to evolve with your organisation's needs

Exhibits is adaptable to policy updates, legislative changes, and organisational shifts - keeping your processes future-fit.

BUILT FOR YOUR ECOSYSTEM

Exhibits supports users across the entire public safety ecosystem - from investigating police, to specialist units including weapons disposal, finance, and forensic units.

Whether it's managing evidence, overseeing compliance, or enabling secure collaboration, exhibits brings your organisation's people and processes together.

One platform. Many users. Shared confidence.

KEY FEATURES

End-to-end exhibit management

Covers the full lifecycle - from collection and tracking to analysis, disposal, and return

Time-stamped movement tracking

Monitor exhibit locations and custody transfers with complete digital handover history

Built-in compliance workflows

Support for legislative requirements - especially for cash, drugs, and firearms- embedded into daily use

Real-time dashboards and reports

Role-based dashboards track workloads and key metrics. Inbuilt reports support the evidential needs of court and justice systems

Mobile-ready functionality

Designed for use in the field or on the go - compatible with desktop and mobile

Task-driven workflows

Assigns and tracks tasks across roles like investigators, exhibit & property officers, managers and specialist units

Centralised digital records

One secure, searchable system that keeps all exhibit data organised and audit-ready

Role-based permissions

Control access by user role to protect sensitive data and ensure strong, consistent governance

Scalable by design

Supports local, regional, or national rollouts with flexible user, database, and performance scaling

Backed by support team

Supported by bdna's 24-hours team of forensic and public safety specialists.

ABOUT BDNA

We bring expertise and technology together to support a safer, healthier future.

Bdna develops software solutions and delivers secure system integration that streamlines how public safety organisations manage data, people, and workflows.

With two decades of experience, we partner with policing, justice, and government agencies to modernise operations and improve community safety - from frontline tools to large-scale transformation programs.

We exist to improve society
