## ***Learn from the industry's most trusted experts!***

Teel Technologies Europe provides cost-effective, platform-neutral training to digital forensic professionals throughout Europe & the United Kingdom. Our courses are taught by industry experts with years of field experience, ensuring you learn the most up to date techniques.

### **Chip-Off Forensics**

5-Day Training / with Certification / ❤️LEO

This class will provide students with an in-depth education into performing forensics on BGA memory chips used in today's mobile devices.

### **In-System Programming (ISP)**

5-Day Training / ❤️LEO

In this course students will gain the comprehensive skills needed to perform ISP extractions from devices with eMMC and eMCP memory.

### **Flasher Box / Bootloader Forensics**

5-Day Training / Open Course

In this course, students will learn about utilities used to unlock and acquire mobile device memory in both high and low-end devices.

### **Embedded Hardware Forensics**

5-Day Training / Open Course

This course will focus on techniques to access digital data at the physical level from a variety of sources, including IOT devices.

### **Essential Smartphone Forensics**

5-Day Training / Open Course

Our Essential Smartphone Forensics course is designed for the beginner mobile forensics analyst who would like to delve deeper.

### **Board Level Repair**

5-Day Training / Open Course

In this course, students will learn diagnostic skills, troubleshooting resources, and the latest repair techniques through practical application.

### **JTAG Forensics**

5-Day Training / with Certification / Open Course

In this course students will develop the necessary soldering skills and practice advanced JTAG access options to earn their JTAG Forensic Certification.

### **SQLite Forensics Online Training**

10-Day Training / **ONLINE** / ❤️LEO

In this course students will develop the skills required to perform low-level analysis and recovery of SQLite databases.

## New Courses

### Advanced Acquisition Vehicle Forensics

5 Days / **New Course** / Open Course

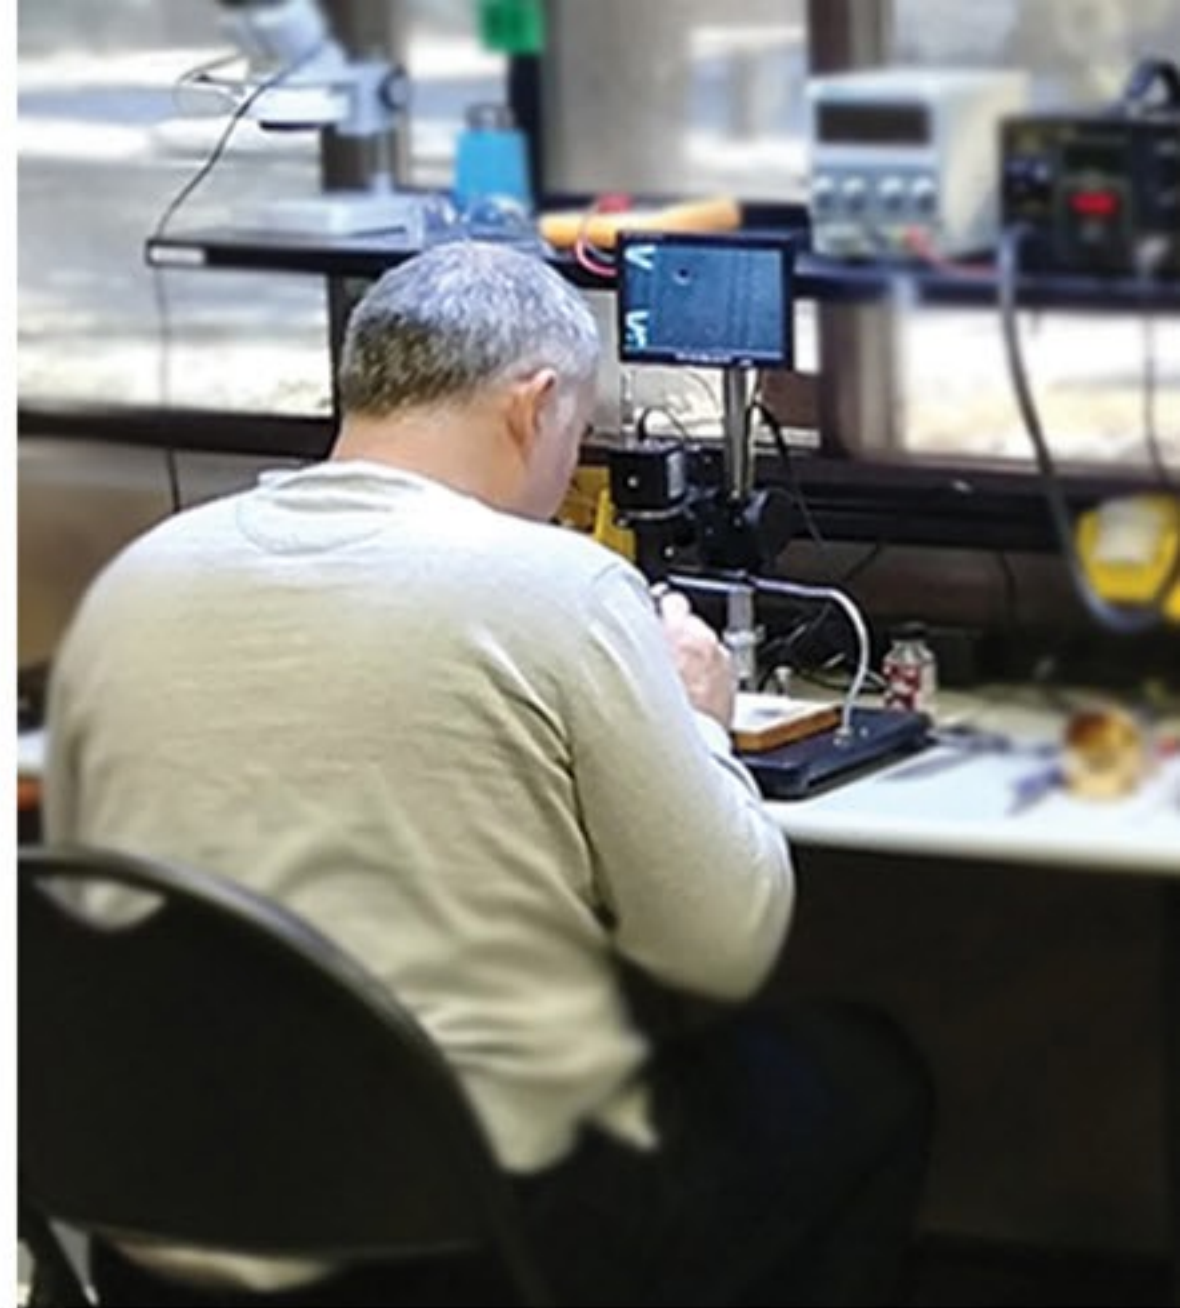

This course provides students with an in-depth look at advanced acquisition and decoding techniques of data recovered from vehicle infotainment, navigation systems, and other electronic control units, using advanced data recovery like Chip-off and ISP.

### Drone Forensics

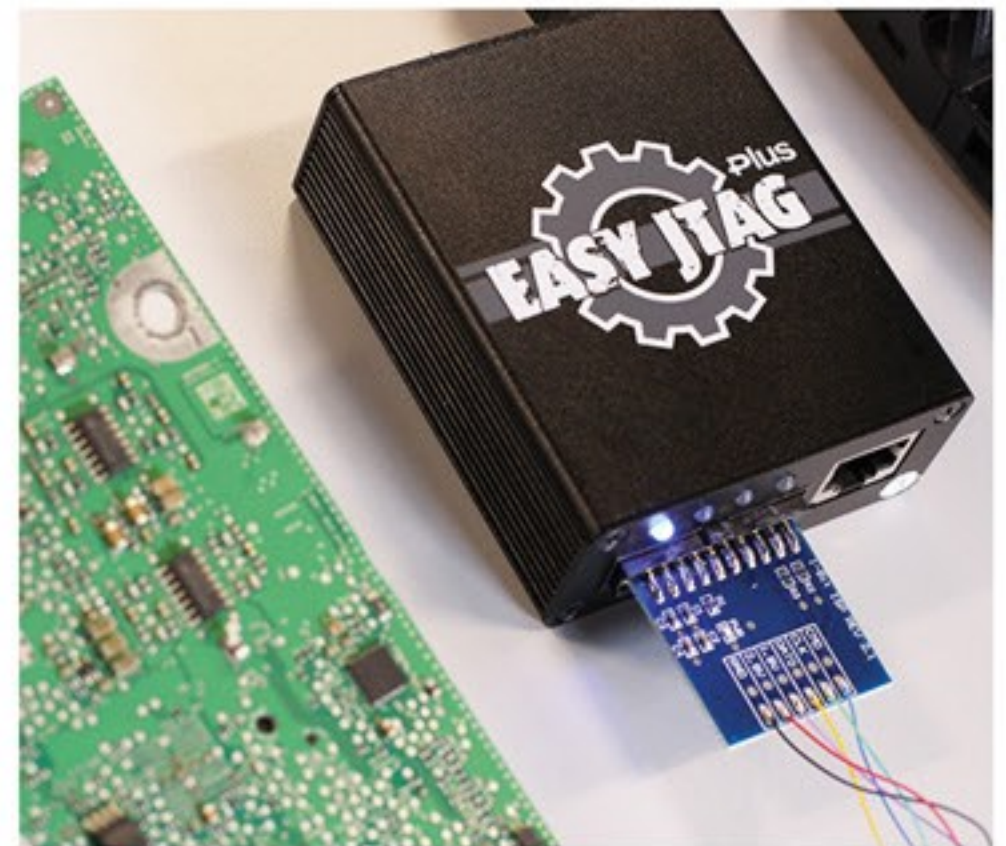

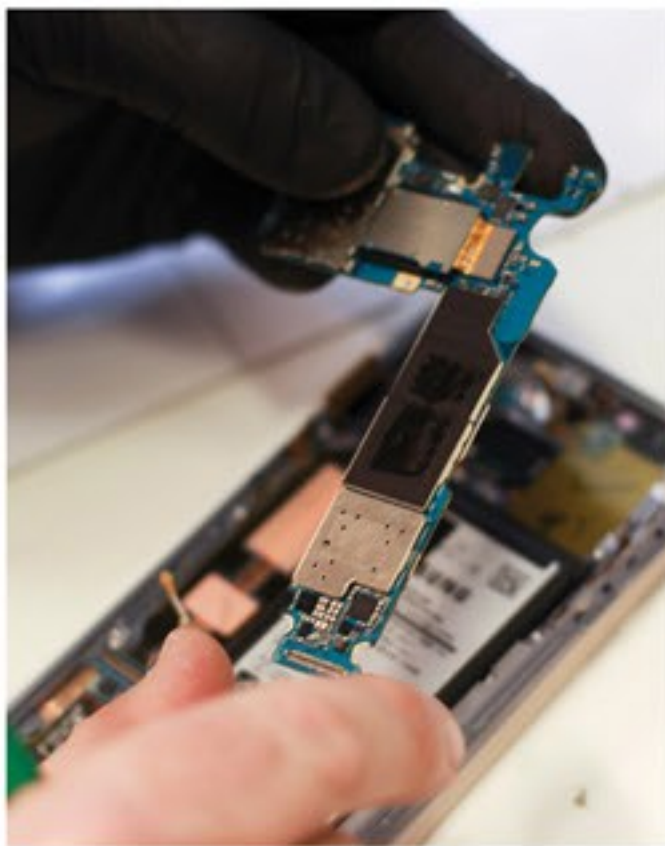

5 Days / **New Course** / **LEO**

The Teel Technologies D-1 UAV Forensics course provides non-digital and digital investigators, first responders and field operators with a comprehensive education in the proper investigation and examination of today's UAVs.

## Custom Courses & Private Training

Our industry experts are happy to collaborate with you to create custom, or combined training options. Schedule a private class at one of our partner training facilities, or request our mobile classroom come directly to you.
